 (54) CAMERA AND CAMERA UNIT USING THE SAME

(71) Applicant : NISCA CORP
 (72) Inventor : UMEDA YOSHITO

(57) Abstract:
PROBLEM TO BE SOLVED: To provide a pan tilt camera with small size and less consumption power.
SOLUTION: The camera includes an image pickup device composed of a lens that optically images an object to be photographed, an optical conversion element that converts the image formed by the lens to electric signals, and a signal output section that sends out the optical video signal with a determined form from the optical conversion element to an external device. Furthermore, the camera includes a moving unit that allows the lens and the optical conversion element to be moved.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
